Skills

JavaScript, React, Node.js, Spring Boot, MySQL, Next.js

Projects

Built a full-stack commerce platform with React and Next.js for storefront experiences, with a Spring Boot backend and MySQL persistence. The project handled checkout flows, catalog browsing, and inventory updates for a retailer client.

Developed an internal admin dashboard with role-based access and analytics panels for sales and merchandising. I integrated payment and order APIs and worked closely with product teams on business requirements.

Led the front-end architecture for a responsive web application and coordinated deployment with the team.

Experience

Full-Stack Engineer, Vantage Commerce — built e-commerce systems and web experiences.

Software Engineer, Nucleus Labs — built services for checkout and product management.
