Skills

JavaScript, Next.js, React, Node.js, GraphQL, TypeScript

Projects

Built a content platform with Next.js and React for editorial publishing, including a rich authoring dashboard and article management workflows. The UI was tightly integrated with a Node.js API and content services.

Created a custom analytics dashboard for tracking engagement, article performance, and marketing funnels, using GraphQL APIs for data access and a server-rendered front-end architecture.

Worked closely with stakeholders to redesign the user experience and improve conversion metrics across editor workflows.

Experience

Frontend Engineer, Lumina Media — built editorial web experiences and dashboard tooling.

Web Developer, Cedar Works — maintained marketing sites and product interfaces.
